

From Column A

Three hands:

1st Col A #1 Banker bets That col B, 1st Decision, will be Banker. (At this time, there are No circles in Col B.

1st Deal / Decision

BANKER (Col 2 Decision #1)

1st bet Wins. Had it not, we would bet it again.

2nd Bet

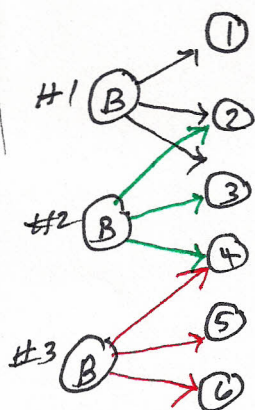

Col A, #2, B. Bet for 2nd Decision \$ in Col B to be B. Loss

3rd Bet

Bet Col A, 3, B to be Banker While

Still betting the above cause it Lost
Sometime you bet ² @ different levels.

Like this hypothetical

B1 bets 1, 2, 3 if necessary

B2 bets 2, 3, 4 " "

B3 bets 4, 5, 6 " "

Bets on 2 + 4 could overlap & cancel. (Low B - Low P)

very complicated. NEED Robot! LOL
