

Ask Marilyn

By Marilyn vos Savant

Say you have four specially marked dice. Two players each select one, and the player who rolls a higher number wins. The faces are 1-1-1-5-5-5, 2-2-2-2-6-6, 3-3-3-3-3-3 and 4-4-4-4-0-0. You're given the first choice. Which die should you choose?
