

16.02.2026. This is 10*20 spins=200, but we have 11 dealer changes.
 As said in compare and other topics, you will usually have the 1x at 37 and sometimes the 2x will have completed 37.
 9x and 10x could start as today. Not often do laps cross the blue line.

F4

As the stream starts F4/floating can miss wins where as T3/Top3 have wins. But the further you go in the stream both F4 & T3 usually use same numbers. Can we say like Turbo, become predictable?
